

# SAGOLA

an Elcometer company

## High light Intensity Led System for SAGOLA spray guns

Highly efficient 4500 Kelvin led that replicates the sun-light. Perfect spray control of metallics, pearls and clear coats.

### High precision visual control in colours spray

Visual control of layer coverage and fan pattern overlap; as well as correct orientation of metallic particle or pearl effect avoiding variations of tone due to bad dispersion of particles and/or mottling due to lack or excess of paint supply.

### Improvement of finish quality

As in the colour base, a better control of layer dispersion and fan pattern overlap will be achieved avoiding irregular clear coat supply (lack or excess material), gloss irregularities, load irregularity (orange peel).

# Altair LED

Version	Code
Sagola 4600	120 100 00
Sagola 3300 GTO	120 110 00
Sagola Mini Xtreme	120 120 00

## Technical benefits

### No shadows

Thanks to its specific design and mounting on the gun, the pattern light does not interfere with any part of the gun avoiding shadows that can hinder vision.

### Ergonomic design

The lighting equipment is perfectly integrated on the spraygun body without altering its center of gravity and its balance.

### CLIP&GO system

It is assembled in a CLIP without the need of disassembling any element from the gun.

### Two levels of light

Two light levels can be selected.

Level 1

Level 2

Support lighting in interior areas with many shaded areas.

Sunny light much more shiny.

### Construction

Made of high-resistance polyamide providing great durability against impacts. Leds area with stainless steel and glass cover that guarantees a perfect dispersion of light and easy cleaning.

Lighting Kit

Lithium batteries

Battery charger

### Technical Information

- Leds 4500 kelvin (CRI:92)
- Lithium batteries 3.7 V 4.07 Wh AA size
- 510 lumens of light scattering
- Batteries life    Level 1: 160 minutes  
                          Level 2: 80 minutes
- Weight: 118 g. (0.26 lbs) with batteries
