

## NEW AIRCAPS 2014

### NEW FEATURES - NEW SOLUTIONS - BETTER FINISHING

SAGOLA introduces its two new air caps for the best spray gun in the market.

Wider solution range for the big diversity of waterborne paints and clearcoats in the market.

## LXT TITANIA

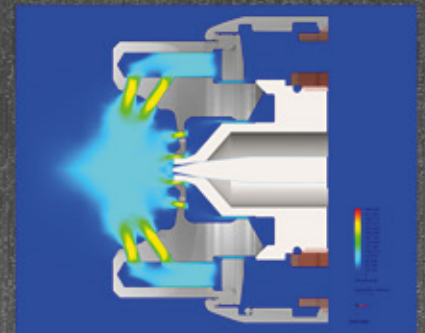

- Easier application of high viscosity and strength (anti-scratch, ceramic, etc.) clearcoats and single stage paints.
- High speed and maneuverability.
- No suction power lose if the gun is used at its higher pressure and air contribution levels.
- Very high air flow capacity in the mix area.
- Higher microatomization capacity.

## LXT HVLP

- Minimum product consumption. Minimum pressure and maximum transfer 75%.
- Ideal color distribution for the double stage basecoats, water and solvent.
- Ideal for silvers. Shades minimization.
- Big fan and application speed.

CONVENTIONAL  
high transference systems

LXT TITANIA  
Very high air flow in the mix area  
Microatomization

## TECHNICAL DETAILS

Air consumption	320 L/min.
Paint volume	205 g/min.
Fan size	295-300 mm.
Application distance	18-20 cm.

Air consumption	510 L/min.
Paint volume	180 g/min.
Fan size	325-330 mm.
Application distance	15-18 cm.

Fan  
LXT TITANIA  
295-300 mm.

Fan  
LXT HVLP  
325-330 mm.
